Art Unit: 1614

Restriction to one of the following inventions is required under 35 USC 129:

Group I, claims 1-28 is drawn to a composition and method of treating a cox-2 mediated disorder using a cox-2 inhibitory drug classified in class 514, subclass 277.

Group II, claims 29-39 is drawn to a composition and method of treating a cox-2 mediated disorder using a cox-2 inhibitory drug in combination with a second drug, classified in class 514, subclass 277, 530 and 573.

Group III, claims 39-40 is drawn to composition and method of treating an eye disorder using a drug of low solubility, classified in class 514, various subclass.

The above delineated inventions are independent and patentably distinct from another. Each of the above group is drawn to totally different components. One practicing the invention of one of the above groups would not be required to practice the inventions of any of the other groups. The search for the above groups would not be co-extensive. Each of the above groups is capable of supporting its own patent. Thus, restriction for examination purpose is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
